

ARABIAN ACRES METROPOLITAN DISTRICT

MONTHLY OPERATIONS REPORT

September 15, 2017 to October 11, 2017

Submitted by: Lynn Willow, O.R.C/Operator

TOTAL WELL PRODUCTION

Control Building – A: 387,125 gallons

Control Building – B: 12,872 gallons

TOTAL PURCHASED WATER

Trucked – 0

(amount actually received per each 4,000 gallon load is generally 200-300 gallons less due to standard and typical hauling losses)

OPERATIONS & MAINTENANCE ISSUES

- 1) Bac-T samples for the month have been taken and are negative.
- 2) Lead and copper testing for state compliance has been completed and AAMD is within the standards set by the EPA.
- 3) The district has been in need of a tank circulator for several years now. A tank circulator will improve our water quality and most importantly keep ice from forming in the tank (usually 3') it will also reduce the wear and tear on the interior coating of the storage tank.
- 4) The cost for one with installation is between \$7,800.00 to \$13,000.00. I have asked Adam for recommendations on which one we should get. We need to install before the thick ice starts to form in the tank.

OTHER BUSINESS:

Winter is here. Please check your plumbing for proper installation.

If anyone has questions about protecting your water lines, please call Lynn Willow.

Remember you get one free turn-off and turn-on per year.

Please contact me at 719-482-5125 about any vacant homes in your area.
